

Indiana's Telephone Privacy Law was the best thing that has ever happened. My Mom babysits my 4 year old niece and 2 month old nephew. She has her hands full already and loves not getting those annoying calls. I would also like to state that my mother-in-law was also placed on the list by me and it has improved her life tremendously. She is 75 years old and had a pacemaker put in last year. She was constantly getting bothered by the calls and people were downright rude to her. The quality of life is so much better when it is a friend on the phone instead of a rude salesman, especially now that money is so tight. Please take my note into consideration. Thank you.
